

6 transmitting, by said base station, said identifying code set;  
 7 receiving, by a mobile station, said identifying code set;  
 8 determining, by said mobile station, whether said received identifying code comprises a  
 9 valid code word; and

10 if said received identifying code does not comprise a valid code word, cyclically shifting  
 11 symbols of said identifying code and returning to said determining step.

19. The method of claim 18, further comprising the step of outputting, by said mobile station,  
 a number of cyclical shifts made to obtain said valid code word if said received identifying code  
 comprises a valid code word.

1 20. The method of claim 18, wherein said number of cyclical shifts made to obtain said valid  
 2 code word indicates a frame timing for said valid code word - -

# REMARKS

Favorable reconsideration of the above-identified application, as presently amended, is  
 respectfully requested.

In view of the foregoing, Applicant respectfully requests the thorough reconsideration of  
 this application and earnestly solicits an early notice of allowance.
